PROFESSIONAL SUMMARY

Vision-driven Full-Stack Web Developer with record of successful work in Security.

Full-Stack Web Developer experienced in HTML5/CSS, Git, Bootstrap, JavaScript, jQuery, APIs, AJAX, Node, Express servers, MySQL, Handlebars, Sequelize, Testing Error, Handling, Heroku, MongoDB, Progressive Web Apps (PWAs), ReactMERN, Java, Visual Studio, IntelliJ IDEA, Computer Science, Portfolios, Microsoft office (Windows, Word, Excel, Outlook, Powerpoint), Customer Service, Strong Analytical Aptitude, Attention to detail, Communication Skills, Desire for continuing Education, Creativity, Logical thinking, Mathematically Inclined, Problem Solving Skills, Team player.

EDUCATION

FULL STACK WEB DEVELOPMENT CERTIFICATE, 2020 *The George Washington University Bootcamp*

Senior System Engineer , 2019 *George Mason University*

Loss Prevention Certificate, 2017 *D&D security*

Associate Degree in Electrical Engineer, 2016 *Northern Virginia community college*

TECHNICAL SKILLS

HTML5/CSS, Git, Bootstrap, JavaScript, jQuery, APIs, AJAX, Node, Express servers, MySQL, Handlebars, Sequelize, Testing Error, Handling, Heroku, MongoDB, Progressive Web Apps (PWAs), ReactMERN, Java, Visual Studio, IntelliJ IDEA, Computer Science, Portfolios, Microsoft office (Windows, Word, Excel, Outlook, Powerpoint).

PROJECTS

Weather-Dashboard. Link to GitHub : https://github.com/papy1974/h6_weather- | **Link to Deployed Project:**

https://papy1974.github.io/h6_weather-/

- This project emphasizes the use of using an API call and jQuery to make dynamic changes to an HTML document
- Responsibilities: Create a weather app with search input for customer input, 3 API calls for Current Weather, 5-day Forecast and UV Index, 3 Separate cards with search history, current weather and 5-day weather. Local storage will save user history

- Tools / languages used: HTML, CSS, JavaScript, jQuery, Bootstrap, API, Ajax

Code-Quiz. : GitHub : https://github.com/papy1974/papy_code_quiz | **Link to Deployed**

Project: https://papy1974.github.io/papy_code_quiz/

- This project emphasizes the use of HTML, CSS, JavaScript documents create a quiz with multiple choice questions using JavaScript to make dynamic changes to and appending of HTML document
- Responsibilities: Create a timer button that when pressed will start a reverse countdown and start the quiz., Start Quiz, Final Score and Highscores will be on appended HTML page
- Tools / languages used: HTML, CSS, JavaScript.

Eat-Da-Burger. GitHub: <https://github.com/papy1974/papy--burger> | Link to Deployed : <https://sleepy-plains-11022.herokuapp.com/>

- This project emphasizes the use of using MySQL, express, express-handle bars to dynamically update a tracking app.
- Responsibilities: convert an existing project to be installable as a PWA, has API routes and HTML routes, and works offline
- Tools / languages used: Express, JavaScript, NPM packages, HTML, CSS.

PROFESSIONAL EXPERIENCE

Revature (Online Training), December 2018 – December 2019
Web developer

- Gained idea on Developing Web Application with ASP.Net Web for better web deployment.
- Studied how to connect any .Net Application to SQL Server to create tableau and ensure the deployment.
